2023 – 2024

PROFESSIONAL SUMMARY

Front-end & Game Developer with hands-on experience building production AI-powered web platforms and multiplayer 2D games. Experienced in AI-assisted development using **OpenAI Codex CLI**, **ChatGPT** and **Claude Code** to accelerate implementation, debugging and code exploration while maintaining code quality through review and testing. Comfortable delivering React, TypeScript and Phaser applications in collaborative teams.

WORK EXPERIENCE

Game Developer — Phaser / Godot

08/2025 – Present

TNG Technology, Media & AI Co., Ltd

- ▶ Build and iterate 2D game features for Web and Mobile with Phaser 3 and Godot.
- ▶ Turn gameplay and UI requirements into working mechanics, levels, interfaces and animations.
- ▶ Implement gameplay systems following established architecture and coding conventions, including save/load, inventory, quest and progression features.
- ▶ Test builds on browsers and mobile devices, investigate issues and iterate on performance and usability.
- ▶ Integrate third-party SDKs, analytics and in-game advertising by following technical documentation.
- ▶ Collaborate with Designers, Artists and QA, responding to feedback throughout development.

FEATURED PROJECTS

Tranver

🔗 Live Website

Company Project · Ongoing · Team of 4

Implemented production-ready React interfaces for an enterprise AI workforce platform supporting onboarding, AI chat, 3D office workspace, skills marketplace, reports, wallet and administration. Delivered responsive bilingual experiences across **7+ product areas** within a four-person team.

STACK

React 19 TypeScript TanStack Query Three.js / R3F SSE

CDHC — Con Đường Hữu Cơ

🔗 Live Website

Company Project · 03/2026 – 07/2026 · Team of 5

Implemented and debugged production React interfaces for a community commerce ecosystem serving **five user roles**: customers, suppliers, partners, community stations and administrators. Delivered **eight core workflows** spanning shopping, orders, QR pickup, referral/cashback, inventory, content, events and messaging, with PWA/Capacitor support.

2025
- Aptech Intl. Software Engineering
2024

LANGUAGES

- Vietnamese ●●●●●
- English ●●●●●

VAPEC

[Live Website](#)

Production Platform · Collaborative Project

Implemented production React features for the Vietnam Private Enterprises Association across **57 routes**, including public content, news/audio, member registration, four role-based dashboards, showroom and storefront experiences. Integrated API-driven content, cookie-session authentication, TanStack Query and Cloudflare Functions for SPA routing and dynamic social metadata.

 - TypeScript
 - TanStack Query
 - Vite
 - Cloudflare Functions

2D Survival Multiplayer Web Game

[Live Demo](#)

Personal Project · Ongoing · Solo Developer

Built a 2D action-survival game supporting **real-time multiplayer sessions**, Firestore friend invitations, Google sign-in, character selection, enemy waves, a **55-weapon system**, skills and effects, loot/chests, inventory/shop, revive flow, responsive HUD and desktop/mobile controls.

Tic Tac Toe - Real-time Web Game

[Live Demo](#) [GitHub](#)

Personal Learning Project · Solo Developer

Created a learning-focused real-time Tic Tac Toe project with Vue, NestJS and technical documentation. Implemented room-ID joining, automatic X/O assignment, turn and winner checks, Socket.IO board updates, replay/leave actions and disconnect handling, then deployed the frontend and backend for live testing.
